# Author Index for Papers in Volume 25

*Pages are numbered consecutively through the volume: 1–104, January; 105–216, May; 217–352, July; 353–846; September; and 847–994, November. Communications are identified by (C).*

**Allen, F. E.**
535 *The History of Language Processor Technology in IBM*

**Auslander, M. A.,** D. C. Larkin, and A. L. Scherr
471 *The Evolution of the MVS Operating System*

**Av-Ron, Moshe**
167 see Shatzkes, Morris

**Bagus, Paul S.,** and Arthur R. Williams
793 *Electronic Structure Theory*

**Bard, Yonathan,** and Charles H. Sauer
562 *IBM Contributions to Computer Performance Modeling*

**Bashe, C. J.,** W. Buchholz, G. V. Hawkins, J. J. Ingram, and N. Rochester
363 *The Architecture of IBM's Early Computers*

**Beattie, H. S.,** and R. A. Rahenkamp
729 *IBM Typewriter Innovation*

**Bechtel, S. E.,** D. B. Bogy, and F. E. Talke
963 *Impact of a Liquid Drop Against a Flat Surface*

**Belady, L. A.,** R. P. P...melee, and C. A. Scalzi
491 *The IBM History of Memory Management Technology*

**Berman, C. Leonard**
272 see Darringer, John A.

**Berndlmaier, E.,** J. A. Dorler, J. M. Mosley, and S. D. Weitzel
135 *Delay Regulation—A Circuit Solution to the Power/Performance Tradeoff*

**Bogy, D. B.**
963 see Bechtel, S. E.

**Bongiovanni, G.,** and C. K. Wong
83 *A Number Representation Convertor for Magnetic Bubble String Comparators (C)*

**Brede, D. W.**
677 see Harker, J. M.

**Buchholz, W.**
363 see Bashe, C. J.

**Buturla, E. M.,** P. E. Cottrell, B. M. Grossman, and K. A. Salsburg
218 *Finite-Element Analysis of Semiconductor Devices: The FIELDAY Program*

**Calo, S. B.**
915 *Delay Analysis of a Two-Queue, Nonuniform Message Channel*

**Carter, W. C.**
453 see Hsiao, M. Y.

**Case, P. W.,** M. Correia, W. Gianopulos, W. R. Heller, H. Ofek, T. C. Raymond, R. L. Simek, and C. B. Stieglitz
631 *Design Automation in IBM*

**Chang, C. S.**
25 see Gruodis, A. J.

**Chen, J. Z.,** W. B. Chin, T.-S. Jen, and J. Hutt
142 *A High-Density Bipolar Logic Masterslice for Small Systems*

**Chin, W. B.**
142 see Chen, J. Z.

**Clarke, T. C.**
51 see Street, G. B.

**Clementi, Enrico**
315 *Computer Simulations of Complex Chemical Systems: Solvation of DNA and Solvent Effects in Conformational Transitions*

**Correia, M.**
631 see Case, P. W.

**Cottrell, P. E.**
218 see Buturla, E. M.

**Creasy, R. J.**
483 *The Origin of the VM/370 Time-Sharing System*

**Critchlow, D. L.**
585 see Pugh, E. W.

**Dansky, A. H.**
116 *Bipolar Circuit Design for a 5000-Circuit VLSI Gate Array*

**Darringer, John A.,** William H. Joyner, Jr., C. Leonard Berman, and Louise Trevillyan
272 *Logic Synthesis Through Local Transformations*

**Diaz, A.,** J. M. Vasquez Vallego, and A. Martinez Duran
42 *[Pt] Polypyrrole: A New Organic Electrode Material*

**Donath, W. E.**
152 *Wire Length Distribution for Placements of Computer Logic*

**Dorler, J. A.,** J. M. Mosley, G. A. Ritter, R. O. Seeger, and J. R. Struk
126 *A 1024-Byte ECL Random Access Memory Using a Complementary Transistor Switch (CTS) Cell*

**Dorler, J. A.**
135 see Berndlmaier, E.

**Elzinga, C. D.,** T. M. Hallmark, R. H. Mattern, Jr., and J. M. Woodward
767 *Laser Electrophotographic Printing Technology*

**Engh, James T.**
701 *The IBM Diskette and Diskette Drive*

**Feinberg, I.**
617 see Seraphim, D. P.

**Fitzgerald, William,** Franklin Gracer, and Robert Wolfe
281 *GRIN: Interactive Graphics for Modeling Solids*

**Flatt, H. P.**
571 *Computer Modeling in Energy and the Environment*

**Gianopulos, W.**
631 see Case, P. W.

**Godard, Dominique,** and Daniel Pilost
17 *A 2400-Bit/s Microprocessor-Based Modem*

**Gracer, Franklin**
281 see Fitzgerald, William

**Greanias, E. C.**
187 see Yhap, E. F.

**Grossman, B. M.**
218 see Buturla, E. M.

**Gruodis, A. J.,** and C. S. Chang
25 *Coupled Lossy Transmission Line Characterization and Simulation*

**Hachtel, G. D.,** M. H. Mack, R. R. O'Brien, and B. Speelpenning
232 *Semiconductor Analysis Using Finite Elements—Part I: Computational Aspects*

**Hachtel, G. D.,** M. H. Mack, and R. R. O'Brien
246 *Semiconductor Analysis Using Finite Elements—Part II: IGFET and BJT Case Studies*

**Hallmark, T. M.**
767 see Elzinga, C. D.

**Hamacher, V. Carl,** and Gerald S. Shedler
904 *Collision-Free Local Area Bus Network Performance Analysis*

**Harding, William E.**
647 *Semiconductor Manufacturing in IBM, 1957 to the Present: A Perspective*

**Harker, J. M.,** D. W. Brede, R. E. Pattison, G. R. Santana, and L. G. Taft
677 *A Quarter Century of Disk File Innovation*

**Harris, J. P.,** W. B. Phillips, J. F. Wells, and W. D. Winger
691 *Innovations in the Design of Magnetic Tape Subsystems*

**Harrison, Thomas J.,** Bruce W. Landeck, and Hal K. St. Clair
441 *Evolution of Small Real-Time IBM Computer Systems*

**Hassan, J. K.**
176 see Paivanas, J. A.

**Hawkins, G. V.**
363 see Bashe, C. J.

**Heidelberger, Philip,** and Peter D. Welch
860 *Adaptive Spectral Methods for Simulation Output Analysis*

**Heller, W. R.**
631 see Case, P. W.

**Henle, R. A.**
585 see Pugh, E. W.

**Hirko, R. G.**
295 see Ju, K.

**Hoevel, Lee W.**
877 see Voldman, J.

**Hong, S. J.**
261 see Lee, D. T.

**Hsiao, M. Y.,** W. C. Carter, J. W. Thomas, and W. R. Stringfellow
453 *Reliability, Availability, and Serviceability of IBM Computer Systems: A Quarter Century of Progress*

**Hu, H. L.**
295 see Ju, K.

**Huon, Simon,** and Robert Smith
3 *Network Problem-Determination Aids in Microprocessor-Based Modems*

**Hutt, J.**
142 see Chen, J. Z.

**Ingram, J. J.**
363 see Bashe, C. J.

**James, S. E.**
417 *Evolution of Real-Time Computer Systems for Manned Spaceflight*

**Jarema, David R.,** and Edward H. Sussenguth
391 *IBM Data Communications: A Quarter Century of Evolution and Progress*

**Jen, T.-S.**
142 see Chen, J. Z.

**Joyner, William H., Jr.**
272 see Darringer, John A.

**Ju, K.,** H. L. Hu, R. G. Hirko, E. B. Moore, D. Y. Saiki, and R. O. Schwenker
295 *Propagation of 1-μm Bubbles in Contiguous Disk Devices*

**Kania, F. J.**
755 see Nickel, T. Y.

**Kaufman, Frank B.**
303 *Pi-Donor Intercalate Polymers: Synthesis, Charge-Transfer Interactions, and Applications*

**Keyes, R. W.,** and M. I. Nathan
779 *Semiconductors at IBM: Physics, Novel Devices, and Material Science*

**Kleinfelder, Walter J.**
107 see Logue, Joseph C.

**Kozen, Dexter**
327 *Positive First-Order Logic Is NP-Complete (C)*

**Krakow, William**
58 *Computer Simulation of High-Resolution Electron Micrographs Using Dynamical Electron Scattering*

**Landeck, Bruce W.**
441 see Harrison, Thomas J.

**Larkin, D. C.**
471 see Auslander, M. A.

**Lee, D. T.,** S. J. Hong, and C. K. Wong
261 *Number of Vias: A Control Parameter for Global Wiring of High-Density Chips*

**Leehan, G. W.**
603 see Rymaszewski, E. J.

**Ling, Huey**
156 *High-Speed Binary Adder*

**Liu, C. N.**
71 see Pan, Kelly M.

**Logue, Joseph C.,** Walter J. Kleinfelder, Paul Lowy, J. Randal Moulic, and Wei-Wha Wu
107 *Techniques for Improving Engineering Productivity of VLSI Designs*

**Lowy, Paul**
107 see Logue, Joseph C.

**Lucas, P.**
549 *Formal Semantics of Programming Languages: VDL*

**Mack, M. H.**
232 see Hachtel, G. D.

**Mack, M. H.**
246 see Hachtel, G. D.

**Markowsky, G.**
934 see Wesley, M. A.

**Martinez Duran, A.**
42 see Diaz, A.

**Mattern, R. H., Jr.**
767 see Elzinga, C. D.

**May, F. T.**
741 *IBM Word Processing Developments*

**McGee, W. C.**
505 *Data Base Technology*

**Meyer, Jeanine**
955 *An Emulation System for Programmable Sensory Robots*

**Moore, E. B.**
295 see Ju, K.

**Mosley, J. M.**
126 see Dorler, J. A.

**Mosley, J. M.**
135 see Berndlmaier, E.

**Moulic, J. Randal**
107 see Logue, Joseph C.

**Müller, K. A.,** and E. Pytte
811 *Phase Transitions*

**Mulvany, R. B.,** and L. H. Thompson
711 *Innovation in Disk File Manufacturing*

**Nathan, M. I.**
779 see Keyes, R. W.

**Nickel, T. Y.,** and F. J. Kania
755 *Printer Technology in IBM*

**O'Brien, R. R.**
232 see Hachtel, G. D.

**O'Brien, R. R.**
246 see Hachtel, G. D.

**Ofek, H.**
631 see Case, P. W.

**Olsen, P. F.,** and R. J. Orrange
405 *Real-Time Systems for Federal Applications: A Review of Significant Technological Developments*

**Orrange, R. J.**
405 see Olsen, P. F.

**Padegs, A.**
377 *System/360 and Beyond*

**Paivanas, J. A.,** and J. K. Hassan
176 *Attraction Force Characteristics Engendered by Bounded, Radially Diverging Air Flow*

**Pan, Kelly M.,** and C. N. Liu
71 *Tomographic Reconstruction of Ultrasonic Attenuation with Correction for Refractive Errors*

**Parmelee, R. P.**
491 see Belady, L. A.

**Pattison, R. E.**
677 see Harker, J. M.

**Phillips, W. B.**
691 see Harris, J. P.

**Pilost, Daniel**
17 see Godard, Dominique

**Pippenger, Nicholas**
825 *Algebraic Complexity Theory*

**Pugh, E. W.,** D. L. Critchlow, R. A. Henle, and L. A. Russell
585 *Solid State Memory Development in IBM*

**Pytte, E.**
811 see Müller, K. A.

**Rahenkamp, R. A.**
729 see Beattie, H. S.

**Raymond, T. C.**
631 see Case, P. W.

**Ritter, G. A.**
126 see Dorler, J. A.

**Rochester, N.**
363 see Bashe, C. J.

**Russell, L. A.**
585 see Pugh, E. W.

**Rymaszewski, E. J.,** J. L. Walsh, and G. W. Leehan
603 *Semiconductor Logic Technology in IBM*

**Saiki, D. Y.**
295 see Ju, K.

**Salsburg, K. A.**
218 see Buturla, E. M.

**Sammet, Jean E.**
520 *History of IBM's Technical Contributions to High Level Programming Languages*

**Santana, G. R.**
677 see Harker, J. M.

**Sauer, Charles H.**
894 *Approximate Solution of Queueing Networks with Simultaneous Resource Possession*

**Sauer, Charles H.**
562 see Bard, Yonathan

**Scalzi, C. A.**
491 see Belady, L. A.

**Schatzoff, Martin**
848 *Design of Experiments in Computer Performance Evaluation*

**Scherr, A. L.**
471 see Auslander, M. A.

**Schwenker, R. O.**
295 see Ju, K.

**Seeger, R. O.**
126 see Dorler, J. A.

**Seraphim, D. P.,** and I. Feinberg
617 *Electronic Packaging Evolution in IBM*

**Shatzkes, Morris,** and Moshe Av-Ron
167 *Statistics of Breakdown*

**Shedler, Gerald S.**
904 see Hamacher, V. C.

**Simek, R. L.**
631 see Case, P. W.

**Smith, Robert**
3 see Huon, Simon

**Speelpenning, B.**
232 see Hachtel, G. D.

**St. Clair, Hal K.**
441 see Harrison, Thomas J.

**Stevens, L. D.**
663 *The Evolution of Magnetic Storage*

**Stieglitz, C. B.**
631 see Case, P. W.

**Street, G. B.,** and T. C. Clarke
51 *Conducting Polymers: A Review of Recent Work*

**Stringfellow, W. R.**
453 see Hsiao, M. Y.

**Stroebel, Gary**
930 *Message Reassembly Times in a Packet Network (C)*

**Struk, J. R.**
126 see Dorler, J. A.

**Sussenguth, Edward H.**
391 see Jarema, David R.

**Taft, L. G.**
677 see Harker, J. M.

**Talke, F. E.**
963 see Bechtel, S. E.

**Taylor, R. L.**
429 *Low-End General-Purpose Systems*

**Thomas, J. W.**
453 see Hsiao, M. Y.

**Thompson, L. H.**
711 see Mulvany, R. B.

**Trevillyan, Louise**
272 see Darringer, John A.

**Vasquez Vallego, J. M.**
42 see Diaz, A.

**Vinal, A. W.**
196 *A Magnetic Sensor Utilizing an Avalanching Semiconductor Device (C)*

**Voldman, J.**, and Lee W. Hoevel
877 *The Software-Cache Connection*

**Walsh, J. L.**
603 see Rymaszewski, E. J.

**Weitzel, S. D.**
135 see Berndlmaier, E.

**Welch, Peter D.**
860 see Heidelberger, Philip

**Wells, J. F.**
691 see Harris, J. P.

**Wesley, M. A.**, and G. Markowsky
934 *Fleshing Out Projections*

**Williams, Arthur R.**
793 see Bagus, Paul S.

**Winger, W. D.**
691 see Harris, J. P.

**Wolfe, Robert**
281 see Fitzgerald, William

**Wong, C. K.**
83 see Bongiovanni, G.

**Wong, C. K.**
261 see Lee, D. T.

**Woodward, J. M.**
767 see Elzinga, C. D.

**Wu, Wei-Wha**
107 see Logue, Joseph C.

**Yhap, E. F.**, and E. C. Greanias
187 *An On-Line Chinese Character Recognition System*

# Subject Index for Papers in Volume 25

*Each index term below is accompanied by a page number and an author's name. With that name in the Author Index are the title of the paper and the names of coauthors, if any. Communications are identified by (C).*

| *Subject* | *Author* | *Page* |
|---|---|---|
| Air films | | |
| Air flow attraction force | Paivanas | 176 |
| Algorithms | | |
| Algebraic complexity theory | Pippenger | 825 |
| Finite-element analysis of semiconductor devices | Buturla | 218 |
| Fleshing out projections | Wesley | 934 |
| Microprocessor-based modem | Godard | 17 |
| Number of vias in chip | Lee | 261 |
| Number representation converter (C) | Bongiovanni | 83 |
| Analytical models | | |
| Approximate queueing network solutions | Sauer | 894 |
| Computer performance modeling in IBM | Bard | 562 |
| Coupled lossy transmission lines | Gruodis | 25 |
| Finite-element analysis of semiconductor devices | Buturla | 218 |
| For energy and environmental phenomena | Flatt | 571 |
| Message channel delay | Calo | 915 |
| Spectrum analysis of miss ratios | Voldman | 877 |
| Statistics of breakdown | Shatzkes | 167 |
| Arithmetic and logical unit design | | |
| Architecture of early IBM computers | Bashe | 363 |
| High-speed binary adder | Ling | 156 |
| Logic synthesis | Darringer | 272 |
| System/360 architecture and beyond | Padegs | 377 |
| Character recognition | | |
| Chinese character recognition | Yhap | 187 |
| Chemistry and chemical engineering | | |
| Complex computations in chemistry and physics | Bagus | 793 |
| Conducting polymers | Street | 51 |
| Phase transitions | Müller | 811 |
| Pi-donor complexes | Kaufman | 303 |
| [Pt]polypyrrole electrodes | Diaz | 42 |
| Semiconductor science at IBM | Keyes | 779 |
| Simulation of complex chemical systems | Clementi | 315 |
| Communications and communication networks | | |
| Collision-free network performance | Hamacher | 904 |
| IBM data communications, evolution and progress | Jarema | 391 |
| Message channel delay | Calo | 915 |
| Message re-assembly times (C) | Stroebel | 930 |
| Microprocessor-based modem | Godard | 17 |
| Network problem-determination | Huon | 3 |
| Compilers and interpreters | | |
| Formal semantics definition | Lucas | 549 |
| History of language processors | Allen | 535 |
| History of programming languages | Sammet | 520 |
| Memory management | Belady | 491 |
| Complexity theory | | |
| First-order logic is NP-complete (C) | Kozen | 327 |
| Computational methods | | |
| Algebraic complexity theory | Pippenger | 825 |
| Complex computations in chemistry and physics | Bagus | 793 |
| Computer simulations of complex chemical systems | Clementi | 315 |
| Modeling energy and environmental phenomena | Flatt | 571 |

| Design automation in IBM | Case | 631 |
| Electronic packaging in IBM | Seraphim | 617 |
| Improving productivity of VLSI designs | Logue | 107 |
| Number of vias on a chip | Lee | 261 |
| Electrophotography | | |
| Laser printing | Elzinga | 767 |
| Error control codes | | |
| Reliability, availability, and serviceability of IBM computer systems | Hsiao | 453 |

Error detection, correction, and recovery
- Reliability, availability, and serviceability of IBM computer systems — Hsiao — 453

Fabrication
- Semiconductor manufacturing in IBM — Harding — 647

Flexible-disk technology
- Diskette and diskette drive — Engh — 701

Graphics
- Fleshing out projections — Wesley — 934
- For modeling solids — Fitzgerald — 281
- Robot program emulator — Meyer — 955

Ink jet printing
- Liquid drop impact — Bechtel — 963

Integrated circuit design
- A 1025-byte ECL memory — Dorler — 126
- A 5000-circuit VLSI gate array — Dansky — 116
- Coupled lossy transmission lines — Gruodis — 25
- Delay regulation for power/performance tradeoffs — Berndlmaier — 135
- Design automation in IBM — Case — 631
- Electronic packaging in IBM — Seraphim — 617
- High-density bipolar masterslice — Chen — 142
- Logic technology in IBM — Rymaszewski — 603
- Memory development in IBM — Pugh — 585
- Wire length distribution in logic placement — Donath — 152

I/O devices
- Chinese character recognition — Yhap — 187

I/O technologies
- Laser/electrophotographic printing technology — Elzinga — 767
- Printer technology in IBM — Nickel — 755

Large-scale integration
- A 1025-byte ECL memory — Dorler — 126
- A 5000-circuit VLSI array — Dansky — 116
- Delay regulation for power/performance tradeoffs — Berndlmaier — 135
- High-density bipolar masterslice — Chen — 142
- Improving productivity of VLSI designs — Logue — 107
- Wire length distribution in logic placement — Donath — 152

Lasers
- Laser/electrophotographic printing — Elzinga — 767
- Semiconductor science at IBM — Keyes — 779

Lithography
- Pi-donor complexes — Kaufman — 303

Logic design and technology
- Improving productivity of VLSI designs — Logue — 107
- Logic synthesis — Darringer — 272
- Logic technology in IBM — Rymaszewski — 603

LSI chip design automation
- A 5000-circuit VLSI gate array — Dansky — 116
- Design automation in IBM — Case — 631
- Logic synthesis — Darringer — 272
- Number of vias on a chip — Lee — 261
- Wire length distribution in logic placement — Donath — 152

Magnetic bubble technology
- 1-μm bubbles in contiguous disk devices — Ju — 295
- Number representation converter (C) — Bongiovanni — 83

Magnetic head/disk interaction
- Disk and diskette drive — Engh — 701
- Disk file manufacturing — Mulvany — 711
- Innovation in disk files — Harker — 677
- Innovation tape subsystems — Harris — 691
- Magnetic recording — Stevens — 663

Magnetic sensors
- Magnetic sensor semiconductor device (C) — Vinal — 196

Manufacturing technology
- Semiconductor manufacturing in IBM — Harding — 647

Materials
- Conducting polymers — Street — 51
- Electronic packaging in IBM — Seraphim — 617
- Phase transitions — Müller — 811
- Pi-donor complexes — Kaufman — 303
- [Pt]polypyrrole electrodes — Diaz — 42
- Semiconductor science at IBM — Keyes — 779

Mathematics (applied)
- Air flow attraction force — Paivanas — 176
- Algebraic complexity theory — Pippenger — 825
- Design of experiments — Schatzoff — 848
- First-order logic is NP-complete (C) — Kozen — 327
- High-speed binary adder — Ling — 156
- Impact of liquid drop — Bechtel — 963
- Network performance analysis — Hamacher — 904
- Semiconductor analysis using finite elements — Hachtel — 232
- Simulation run length control — Heidelberger — 860
- Spectrum analysis of miss ratios — Voldman — 877
- Tomographic reconstruction of ultrasonic images — Pan — 71
- Wire length distribution in logic placement — Donath — 152

Mechanics and mechanisms
- IBM typewriter innovation — Beattie — 729
- Laser/electrophotographic printing technology — Elzinga — 767
- Printer technology in IBM — Nickel — 755

Medical electronics
- Tomographic reconstructiion of ultrasonic images — Pan — 71

Memory design and technology
- 1-μm bubbles in contiguous disk devices — Ju — 295
- A 1024-byte ECL memory — Dorler — 126
- Improving productivity of VLSI designs — Logue — 107
- Memory development in IBM — Pugh — 585

Memory management
- History in IBM — Belady — 491
- MVS — Auslander — 471
- VM/370 — Creasy — 483

Microprocessor-based applications
- Microprocessor-based modem — Godard — 17
- Network problem-determination — Huon — 3

Models and modeling
- Approximate queueing network solutions — Sauer 894
- Computer performance modeling in IBM — Bard 562
- Computer simulation of electron micrographs — Krakow 58
- Coupled lossy transmission lines — Gruodis 25
- Energy and environmental phenomena — Flatt 571
- Finite-element analysis of semiconductor devices — Buturla 218
- Message channel delay — Calo 915
- Semiconductor analysis using finite elements — Hachtel 232

Office machines and systems
- IBM typewriter innovation — Beattie 729
- IBM word processing development — May 741

Operating systems
- Data base technology — McGee 505
- Memory management — Belady 491
- MVS — Auslander 471
- VM/370 — Creasy 483

Optimization of object programs
- History of language processors — Allen 535

Performance analysis
- Collision-free networks — Hamacher 904
- Design of experiments — Schatzoff 848
- Message channel delay — Calo 915
- Message re-assembly times (C) — Stroebel 928
- Simultaneous resource possession — Sauer 892
- Spectrum analysis of miss ratios — Voldman 877

Physics and physical chemistry
- Complex computations in physics and chemistry — Bagus 793
- Phase transitions — Müller 811
- Semiconductor analysis using finite elements — Hachtel 232
- Statistics of breakdown — Shatzkes 167

Polymers
- Conducting polymers — Street 51
- [Pt]polypyrrole electrodes — Diaz 42

Printing technology
- IBM typewriter innovation — Beattie 729
- IBM word processing development — May 741
- Laser/electrophotographic printing technology — Elzinga 767
- Printer technology in IBM — Nickel 755

Programming and programming languages
- Formal definition of semantics — Lucas 549
- History of data base technology — McGee 505
- History of IBM languages — Sammet 520
- History of language processors — Allen 535

Programming systems development
- IBM real-time systems for federal applications — Olsen 405
- IBM real-time systems for manned spaceflight — James 417
- MVS — Auslander 471
- VM/370 — Creasy 483

Queueing theory
- Message channel delay — Calo 913
- Network performance analysis — Hamacher 902
- Simultaneous resource possession — Sauer 894

Real-time systems
- IBM real-time systems for federal applications — Olsen 405
- IBM real-time systems for manned spaceflight — James 417
- Small real-time IBM systems — Harrison 441

Reliability
- Reliability, availability, and serviceability of IBM computer systems — Hsiao 453

Semiconductor device analysis
- Finite-element analysis — Buturla 218

Semiconductor technology
- Logic technology in IBM — Rymaszewski 603
- Memory development in IBM — Pugh 585
- Semiconductor analysis using finite elements — Hachtel 232
- Semiconductor manufacturing in IBM — Harding 647
- Semiconductor science at IBM — Keyes 779
- Statistics of breakdown — Shatzkes 167

Signal processing
- Microprocessor-based modem — Godard 17

Simulation
- Computer simulation of complex chemical systems — Clementi 315
- Computer simulation of electron micrographs — Krakow 58
- Robot program emulator — Meyer 955
- Run length control — Heidelberger 860

Solid state physics
- Conducting polymers — Street 51
- Pi-donor complexes — Kaufman 303
- [Pt]polypyrrole electrodes — Diaz 42

Statistics
- Design of experiments — Schatzoff 848
- Simulating run length control — Heidelberger 860

Storage device technology
- 1-μm bubbles in contiguous disk devices — Ju 295

Storage devices and systems
- 1-μm bubbles in contiguous disk devices — Ju 295
- A 1024-byte ECL memory — Dorler 126
- Cache miss ratio analysis — Voldman 877
- Disk file manufacturing — Mulvany 711
- Disk or diskette drives — Engh 701
- Evolution of magnetic storage — Stevens 663
- Innovation in disk files — Harker 677
- Innovations in tape subsystems — Harris 691
- Memory development in IBM — Pugh 585
- Memory management — Belady 491

Superconductivity
- Conducting polymers — Street 51

System architecture and development
- Architecture of early IBM computers — Bashe 363
- IBM data communications, evolution and progress — Jarema 391
- IBM real-time systems for federal applications — Olsen 405
- IBM real-time systems for manned spaceflight — James 417

Low-end general-purpose systems at IBM — Taylor — 429
Reliability, availability, and serviceability of IBM computer systems — Hsiao — 453
Small real-time IBM systems — Harrison — 441
System/360 architecture and beyond — Padegs — 377

Systems architecture
Architecture of early IBM computers — Bashe — 363
Cache miss ratio analysis — Voldman — 877
History of data base technology — McGee — 505
History of memory management — Belady — 491
Low-end general-purpose systems at IBM — Taylor — 429
Small real-time IBM systems — Harrison — 441
System/360 architecture and beyond — Padegs — 377
VM/370 — Creasy — 483

Tape drives
Innovations in tape subsystems — Harris — 691

Telecommunications
IBM data communications, evolution and progress — Jarema — 391

Word processing
IBM word processing development — May — 741
